1. Introduction

1.1 OBJECTIVE OF PROJECT:

- To make software which will help students to learn guitar.
- It will help in learning guitar chords.
- It will give students information about guitar

1.2 Description of the project:

- It has 5 frames.
- Frame one is a welcoming frame which will give the option to select what you want to learn.
- Frame one has 2 options.
 - 1.Learn about guitar.
 - 2.To learn chords.
- Frame 3 has information about the guitar which is displayed using an image over the layer.
 - 1.frame3 also has a back button which will return you back to frame2.
- In frame4 it has 2 options to learn about chord
 - 1.G-major chord
 - 2.C-major chord
- Frame5 has information about the G-major chord.

frame 6 has information about the C-major chord
2.screenshots
and description

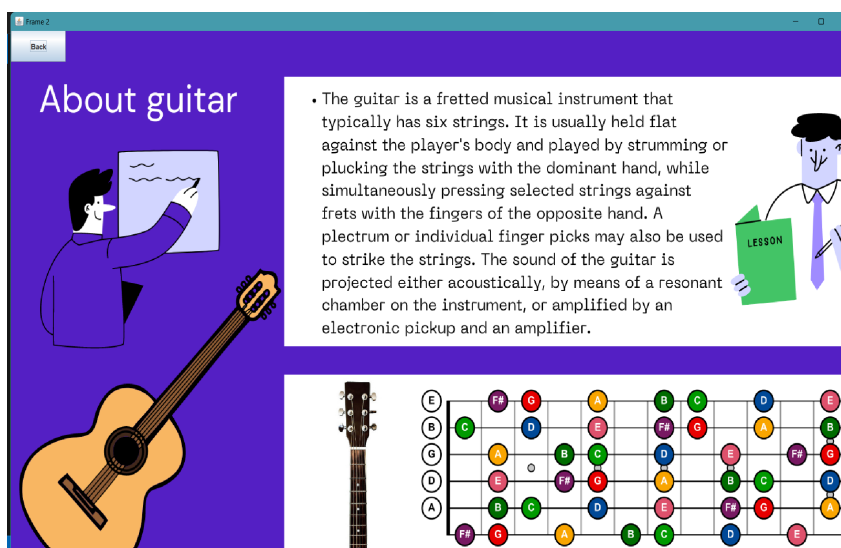

2.1 FRAME 1.

fig(2.1):

- *Frame 1 has two button options.
- *By clicking the button (about guitar) it will land you to frame2.
- *By clicking the button (chords) it will land you to frame3.

2.2 FRAM 2.

fig(2.2):

- In this frame you will get information about guitar.
- There is a back button in this frame by clicking that you can go back to frame1.

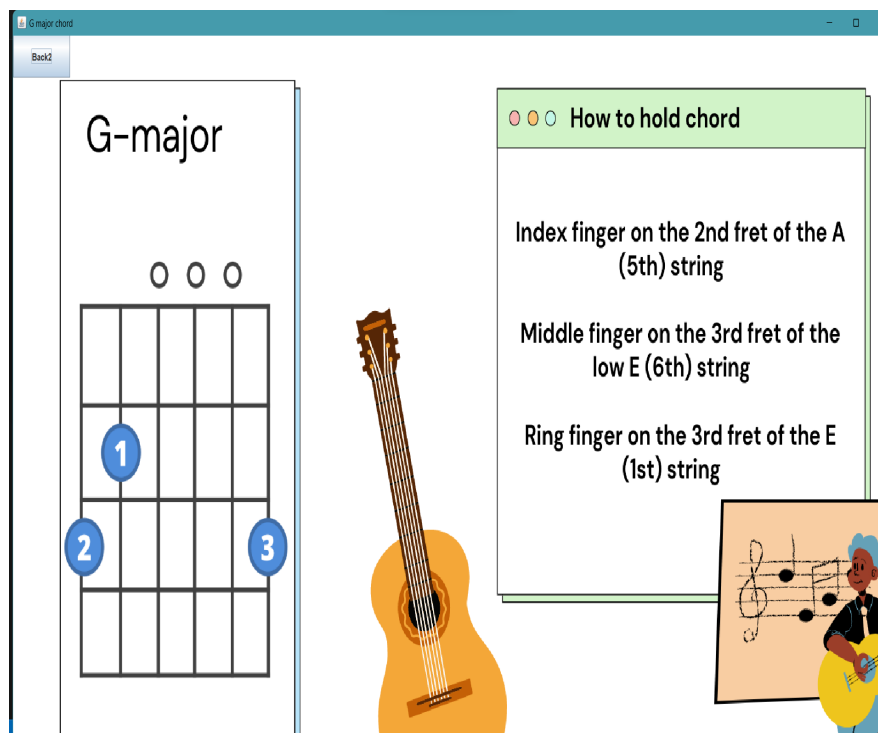

2.3 FRAME 3.

fig(2.3):

- ❖ In frame3 there are two option buttons.
- ❖ By clicking G-major you will land to frame 4.
- ❖ By clicking the C-major button you will land on frame5.

2.4 FRAME 4.

fig(2.4)

- ❖ In this frame you will get information about G-major chord.
- ❖ There is a back button in this frame by clicking that you can go back to frame3.

2.5 FRAME 5.

fig(2.5)

❖ In this frame you will get information about C-major chords.

❖ There is a back button in this frame by clicking that you can go back to frame3.

3. Codes

3.1 FRAME LOGIC:

```
frame1 = new JFrame("ABHI GUITAR LEARNING");

frame1.setSize(300, 450);

frame1.setLayout(null);

frame1.getContentPane().setBackground(new Color(124, 60, 146));
```

3.2 IMAGE LOGIC:

```
Container c = frame1.getContentPane(); // Gets the content layer

JLabel label = new JLabel(); // JLabel Creation

label.setIcon(new ImageIcon("ag1.jpg")); // Sets the image to be displayed as an icon

label.setBounds(0, 0, 300, 450); // Sets the location of the image

c.add(label); // Adds objects to the container
```

3.3 BUTTON LOGIC AND WORKING:

```
// Add the buttons to frame 1

frame1.add(aboutguitar);

frame1.add(chords);

// Create an object

Switch_Frame obj = new Switch_Frame();

// Associate ActionListener with the buttons

aboutguitar.addActionListener(obj);

chords.addActionListener(obj);

// Display frame 1

frame1.setVisible(true); }

// Function to perform actions related to button clicked

public void actionPerformed(ActionEvent e) {

    String button = e.getActionCommand();

    if (button.equals("aboutguitar")) {

        create_frame2(); }

}
```

4. Conclusion Learning by visuals increases learning speed. This software can help students to learn and take knowledge about guitar and its basics.
